

DTU: Creating value for the benefit of society

As a DTU graduate, I always focus on excellent research, and I work for:

Sustainable change

- I work with sustainability from an environmental, economic, and social perspective.
- I have the knowledge to advise on which solutions are most sustainable.

Technology for everyone

- I develop and apply technology responsibly and with awareness of the opportunities and consequences of technology.
- I strive for developing technology that makes a positive difference to people and society.

Social responsibility

- I collaborate across disciplines to develop solutions to the challenges the world is facing.
- I make my knowledge available and contribute to the public debate.
