

# Invitation RECEPTION

## Ole Hansen

After decades at DTU, Ole Hansen has decided to retire from his formal duties and transfer into the position of Professor Emeritus.

Please join us to celebrate his long commitment and outstanding contribution to DTU and industry over 40 years, from his time as a student until now where he has become Professor Emeritus.

### Will be held:

**Friday September 27<sup>th</sup> 2019**

**From 14.00**

**Cantina in building 358**

**DTU Lyngby Campus**

## Resume:

Ole has been a central point in building a micro and nanotechnology based industry in Denmark. He has been teaching and guiding students and has produced countless ideas and inventions, where some have found their way into patents, others have

been kept secret and used to establish a competitive advantage for many a company and others still have led to seminal publications in the field of semiconductor technology, micro and nanofabrication, MEMS, MOEMS and photovoltaics.

We are very happy that Ole has agreed to stay on as Professor Emeritus at DTU Nanolab and will continue to be present, which means that all of us can still meet him and ask him for help here at DTU Nanolab.
