The Technical University of Denmark (DTU) is one of Europe's leading engineering universities, internationally recognized for excellence in research, education, innovation, and scientific advice. DTU develops and creates value using the natural sciences and technical sciences to benefit society. At DTU, we work closely with industry, public authorities, and international partners, offering a dynamic, interdisciplinary, and inclusive working environment.

This internship is offered under DTU's Global Talent Programme, which provides exclusive opportunities for the most exceptional students from DTU's partner universities worldwide. Only bachelor-level students who have been nominated by their home university are eligible to apply. As a participant at DTU, you will join an ambitious academic setting where

- Possesses relevant academic or practical experience in chemistry, microbiology, and/or molecular biology
- Has an interest in sustainability, agriculture, chemical manufacturing, biotechnology, and fungi
- Is creative, mature, analytical, structured, and able to work independently and in a team environment
- Has good collaboration and communication skills
- Demonstrated proficiency in written and spoken English, documented by a recognized English language test. Minimum required scores are:

- Duolingo English Test (overall 120, speaking 120)

- TOEFL (overall 87, speaking 21)

- IELTS Academic (overall 6.5, speaking 6.5)

### **What we offer**

DTU offers a prestigious internship at DTU Lyngby Campus in the Greater Copenhagen area. The internship provides hands-on research experience in a professional and international academic environment. Interns will work closely with leading researchers, contribute to high-level research projects, and apply their theoretical knowledge to advanced scientific challenges. The internship also offers a supportive and flexible environment designed to foster the development of highly capable and motivated students.

Living in Greater Copenhagen offers an enriching experience for international students. The city is renowned for its high quality of life, dynamic cultural scene, and focus on sustainability. Students will have the opportunity to engage with an international academic community, explore innovative research environments, and enjoy the vibrant lifestyle of Denmark's capital region.

As part of the internship, the student will also become a member of DTU's alumni community network, gaining access to a range of exclusive offers and support, including:

- Administrative and practical support – assistance with residence permits, housing, etc.
- Social and networking framework – social and cultural activities, networking across participating students
- Social activities – introduction week and events throughout the semester
- Networking opportunities – engagement across the cohort of students
- Parallel academic opportunities – coursework on the side and potential DTU supervision
